1. The Issue

What PAIN are you solving, for whom and how big is it?

Start writing here. Do not edit yourself. Use bullets, short or long sentences to get your thoughts down. Update as you gain new insights and/or feedback on what resonates with your audience.

TIP : write down all the details until there is nothing more to write, then edit until you can effectively tell your story in less than one minute.

- Tell your story in a way that is emotional, relatable to everyone, and if at all possible, personal

- Use facts (numbers) to help your audience understand how big the issue (PAIN) is
- Find several images that can visually help tell your story — later decide on the final one to use
